

VIKRAM ANUPA

Java Backend Developer

Hyderabad, Telangana | anupavikram9250@gmail.com | +91 95425 78900 | LinkedIn

PROFESSIONAL SUMMARY

Java Backend Developer with 4+ years of experience across the full software development lifecycle, designing and building enterprise-grade banking applications using Java, Spring Boot (MVC), and microservices architecture. Experienced in developing RESTful APIs and Angular-based UI components, securing services with OAuth2, and orchestrating batch jobs with Autosys. Skilled in Agile and DevOps practices, managing CI/CD pipelines with Jenkins and GitHub Actions, and migrating and deploying containerized applications on OpenShift and PCF cloud platforms. Uses GitHub Copilot as part of an AI-assisted development workflow to improve code quality and delivery speed.

TECHNICAL SKILLS

Languages: Java, SQL, TypeScript

Frameworks & UI: Spring Boot (MVC), Spring Cloud, Spring Data JPA, Spring Security, OAuth2, Hibernate, Angular

Architecture & APIs: Microservices, RESTful Web Services, Event-Driven Architecture (Apache Kafka)

Cloud & DevOps: OpenShift, PCF, Docker, Kubernetes, Helm, CI/CD, Jenkins, GitHub Actions, Artifactory, Gradle, AWS

Orchestration & Databases: Autosys, Oracle, SQL Server, MySQL, MongoDB

AI-Assisted Development: GitHub Copilot

Testing & QA: JUnit, TestNG, BDD Automation, Selenium, Regression Test Automation, API Testing (Postman, Bruno)

Tools: Git, GitHub, Bitbucket, IntelliJ IDEA, VS Code, SQL Developer, Postman, Jira, Confluence

Practices: OOA/OOD, Design Patterns, Code Review, Agile/Scrum, Troubleshooting

PROFESSIONAL EXPERIENCE

I.T. Analyst C2

Jul 2026 – Present

Tata Consultancy Services | Hyderabad, Telangana

Project: Bank of America – Global Technology – ITGPST

- Upgraded enterprise middleware applications from Java 17 to Java 25 and Spring Boot to 4.1.1, updating build configurations and dependencies to keep services compatible and supported.
- Migrated an application from legacy Spring Boot 1.x to 4.x, refactoring code to align with the latest compatible framework and library versions.
- Implemented OAuth2 security using Spring Security OAuth2 Resource Server with token introspection URI and client credentials grant.
- Developed an Autosys job to orchestrate a data pipeline, running two SQL queries against GRP and GRPDESC tables and forwarding the extracted data to a downstream service.
- Migrated container base images to Java 25 Hummingbird, remediating container vulnerabilities and strengthening the security posture of deployments.
- Used GitHub Copilot to generate JUnit tests, raising unit test coverage from 0% to 90%+ across all components.
- Build and maintain scalable, secure RESTful APIs for seamless integration between upstream, downstream, and client applications.
- Maintain and enhance shared enterprise services for cross-application functionality, including Audit Logging, Email Notification, and User Profile Management.
- Manage source control in Bitbucket and participate in the full Agile lifecycle (stand-ups, sprint planning, refinement, retrospectives).

Technology Analyst

Feb 2022 – Jun 2026

Infosys Limited | Hyderabad, Telangana

Project: Wells Fargo – Consumer Technology – HLT

- Migrated a project from GitHub on-prem to GitHub SaaS, moving CI/CD from Jenkins to GitHub Actions and hosting from PCF to OpenShift in line with industry standards.
- Deployed the newly migrated application to OpenShift using a dedicated CD repository with Helm-style configuration (values.yaml, predefined chart templates).
- Designed, developed, and managed secure REST APIs enabling communication between microservices and external systems.
- Implemented comprehensive input validation, error handling, and HTTP status code standardization across all APIs, reducing defects in lower environments.
- Built and maintained backend services across Controller, Service, and DAO layers, applying object-oriented design principles and design patterns.
- Contributed to microservices decomposition and implemented resilience patterns (circuit breaker, retry, timeout) using Spring Cloud to improve fault tolerance across distributed services.
- Built CI/CD pipelines with GitHub Actions to automate build, test, and Docker image creation, publishing versioned images to Artifactory.
- Containerized Spring Boot microservices using Docker and managed image versioning in Artifactory.
- Created and maintained BDD regression automation scripts using Selenium and a custom WAF BDD framework, improving test coverage and reducing regression testing effort.
- Performed code analysis, debugging, and execution of automation tests to ensure code quality and non-functional requirements were met.
- Developed Angular-based UI components using TypeScript.
- Participated in the full Agile lifecycle: daily stand-ups, sprint planning, refinement, and retrospectives.

EDUCATION

Bachelor of Technology

2021

Mahaveer Institute of Science and Technology – Hyderabad
